DESCRIPTION: **GATOR EFFLORESCENCE CLEANER** eliminates the spots caused by efflorescence caught in the concrete pavers and natural stone pores. It will make the pavers look more clean and vibrant. The efflorescence cleaning is a necessary step before a sealer is applied. The sealer will be able to get a deeper penetration into the now clean pores.

FEATURES:

- Removes efflorescence from the surface of concrete pavers and natural stones
- No muriatic acid in product
- Washes off with water
- 3.78 L. (1 U.S. gal.) cleans approx. 18 sq. m. (200 sq. ft.)
- 18.9 L. (5 U.S. gal.) cleans approx. 19 sq. m. (1000 sq. ft.)

FOR USE ON: Concrete pavers or slabs

PLEASE NOTE:

- 1) Gator Clean Efflorescence Cleaner should be used prior to applying a sealer to ensure a proper sealer adhesion.
- 2) Do not let product dry up on paver surface.
- 3) Wear goggles and rubber gloves.
- 4) Never use on new concrete pavers. Wait at least 60 days after new pavers are installed before using this product.
- 5) Dilute to 4 parts water, 1 part Gator Clean concentrated liquid, any concentration greater than this can discolor the pavers.

IDEAL MIXTURE: 4 parts water – 1 part product

APPLICATION

INSTRUCTIONS:

- 1) Wet paver surface with water.
- 2) Dip a hard bristle brush in a pail containing the diluted product, apply on the paver surface and scrub. One liter of diluted product is to be used for every 50 sq. ft. of paver surface.
- 3) Rinse thoroughly with water and move on to the next section of 50 sq. ft.
- 4) Repeat steps 2 & 3 over all the sections in question.
- 5) Once the surface is clean, use a water hose and generously rinse off Gator Efflorescence Cleaner until there is no more foaming action on the pavers.

NOTE: You might have to redo it again if there is a lot of efflorescence trapped in the pavers.
